FIBER INTERNET ACCESS (FIA)
DEDICATED LAN TO INTERNET CONNECTIONS

CONTINUOUS, HIGH-BANDWIDTH CONNECTIVITY

Propel employee productivity with a dedicated gateway to the Internet through Spectrum Enterprise Fiber Internet Access (FIA). The secure, reliable connection provides high-speed connectivity for all your locations.

Mobile, cloud and enterprise applications demand more and more bandwidth from existing networks, just so employees can complete their daily tasks. Meanwhile, executives seek to innovate and expand while slashing budgets. As trends and technologies change, your IT team can easily become as strained as your network. Spectrum Enterprise Fiber Internet Access (FIA) can help you keep up with the power and flexibility to meet your high-speed connectivity needs.

You may not be aware but the statistics show that the time to consider moving to fiber and increasing your Internet capacity is now. By 2020, Gartner expects that more than 26 billion devices will be connected to the Internet—and of those, 40 percent will be enterprise IoT devices. Spectrum Enterprise provides the scalable, speedy, secure solutions you need to accommodate current and future business needs.

CONTINUOUS, HIGH-BANDWIDTH INTERNET ACCESS

Spectrum Enterprise Fiber Internet Access (FIA) features a dedicated and continuous link between a business's local area network (LAN) and the Internet. This Ethernet-based service provides dedicated symmetric Internet access that supports incremental speeds from 25 Mbps up to 10 Gbps with guaranteed minimums and uptime.

THE FUTURE IS NOW

Talk to your Spectrum Enterprise Account Executive today to get started. Our dedicated team will partner with you to create a solution that meets all your business needs.

ENHANCE PRODUCTIVITY, TODAY AND TOMORROW

▸ Empower employees to do more with the ultra-fast, ultra-reliable connection provided by Spectrum Enterprise Fiber Internet Access (FIA)

▸ Easily handle multiple employees simultaneously downloading files, making VoIP calls and tapping into web-based applications

▸ Ensure a secure connection to protect your valuable business data

▸ Deliver guaranteed high performance, day in and day out, for businesses that depend on fast connectivity and consistent availability

▸ Feature a highly scalable design to meet your most demanding and ever-growing needs

NETWORKS BUILT FOR MISSION-CRITICAL DATA NEEDS

Spectrum Enterprise Fiber Internet Access (FIA) provides a proven, reliable network that enables your business to work faster, more securely and with fewer interruptions to enable business growth.

▸ Bandwidth speeds from 25 Mbps to 10 Gbps allow businesses to scale up quickly when demand increases

▸ Ensure reliability regardless of location; get reliable connectivity whether your business is in a metropolitan or outlying area

▸ Dedicated symmetric Ethernet-based Internet access

▸ Redundant core network maximizes availability

▸ Multihoming for redundant connectivity

▸ Scalable Ethernet ports primed for future growth

▸ Ability to purchase IPv6 address blocks

▸ Service-level agreements (SLAs) for peace of mind

Bandwidth speeds from 25 Mbps to 10 Gbps allows businesses to scale up quickly when demand increases.

SEAMLESS SERVICE, EXPERT SUPPORT

Companies are partnering with Spectrum Enterprise to reduce costs and the drain on your IT resources.

1 Gbps. Every fiber circuit supports at least 1 Gbps—call Spectrum Enterprise to add capacity when you need it.

1 Owner. We own and operate our network. The optical, Ethernet technology and MPLS-enabled backbone reduce the likelihood of costly downtime.

1 Number. We give you just one number to call when you need service—80 percent of calls are answered in 30 seconds and 90 percent of issues are resolved in one call.

1 Team. Receive face-to-face service from local account teams as well.
